Concierge_JG.aspx Form to enter external media references into the Concierge Catalog (**Catalog.aspx**). Called from **Default.aspx**.

cboOwner – CMS use – associated entity.

chkTestOnly – CMS flag

cboSubmitted – CMS use (*future auto populated by logged-in user*)

cboMedia – used to select embed parse match, process path, thumbnail routine.

lstCategory – CMS use – lookup

ddlAssociatedPE – CMS use – lookup

ddnAssociations – CMS use – lookup

listGroups – CMS use – lookup

rbnLinkThumb, rbnLinkButton, rbnLinkText – used to select anchor link style, process.

txtLinkInfo – location of anchor image OR actual anchor link text.

txtContent – valid url path to media object

btnOptions – link to popup...

btnNew – clear form and link to self.

btnPrevious – link to default.aspx

Popup Help

cboCampaign – CMS use, entity sub-class

txtOwnerType.. – CMS lookup – read only

txtPct – changes image display size

txtTitle – CMS use, passed to **assembleFB()**

txtCaption – CMS use, passed to **assembleFB()**

txtKeywords – CMS use – *future use case*

textDesc – CMS use for identification and *future search*

textNotes – CMS use for identification and *future search*

litPreview – object literal which holds generated anchor tag from **btnBuild** routine

btnBuild – calls **parseContent()**, which parses **txtContent** for valid media URI & builds the Floatbox anchor string, utilizing the fb... class; returns LitPreview, to form.

btnMsg – duplicates **btnSave** functionality AND calls and prepopulates the send message dialog, send.aspx

btnSave – duplicates btnBuild functionality (calls **parseContent()**) THEN calls **postData()**, which parses out txtContent for url, size, etc, and saves all form data to **Catalog.aspx**
